# Maximilian 2.0 standard

The most large venue screen

 Base from 800 up to 1200 cm.

## Fabrics

## Polichinelle system

With "Polichinelle" system the wrapping tube goes down to the lower end stroke while unwrapping the projection fabric until it is completely open. The system uses two lateral cables to put the tube in motion. In our screen, the two cables are replaced by two stainless steel belts which, when wrapping up, avoid any possible overlapping or derailment.

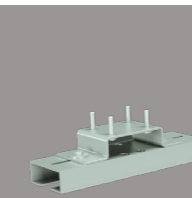

## Brackets

Eyebolt lifting brackets

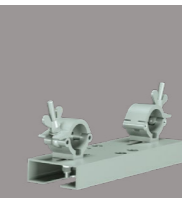

Ceiling mount brackets

High Ceiling mount brackets

Truss mount brackets

Hoist chains

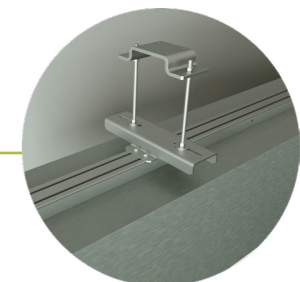

## New improved version

- No more junctions: one piece rolling tube
- 15% lighter than previous versions
- Double speed 0,50 m/s thanks to the new motor: 70 -120 rpm
- Replaced steel cables with steel belts: quieter and safer.
- New motor with additional safety system. Installed on the desired side.
- Control box supplied disconnected (quick plug - in system on board)

## Easy installation

The aluminium supporting beam on top of the screen holds four sliding plates which allow the installation of the screen with clamps and brackets suitable for concrete, steel or wooden beams.

## Key features

- Motorized screen of "polichinelle" system
- The wrapping tube goes down thanks to 4 stainless
- Stainless steel belts with safety blocks at the two extremities
- Side motor with motion transmission through rotating axles
- Black case

## New Service Screen Assembly on site.

- Screenline offers transportation, portorage and screen assembly service in a theater. We will pack the screen in packages with dimensions congruent to the space available for the access to the theater and we will assemble it on site.
- Our team will deliver it perfectly assembled in the right position to complete the installation.

### Key features

- For Large venues
- Perfect integration of the counterweight in the box in the long run.
- Side motor with motion transmission through rotating axles
- Anti - droop - fabric.

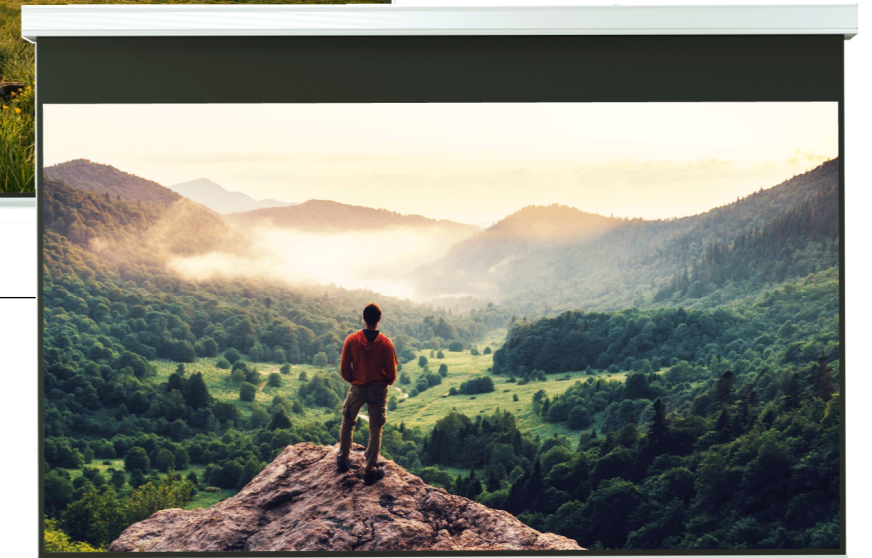

### Features

- Lodo is both sturdy and practical: the mechanism made of robust aluminium components allows the installation of fabrics. Wide at the base.
- The brackets allow wall or ceiling installation, choosing the distance of the screen from the wall and make it possible to correct the central position also once installed.

## Key features

- For Large venues
- Easy and fast fabric installation with pressure arrow border
- Robust frame
- Various positioning accessories
- Extremely versatile in many applications
- Also available with pins system

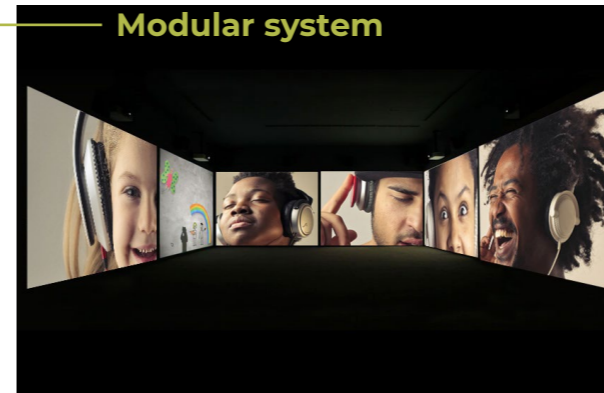

## Features

- Fast:** New frame with arrow borders. Easily installed thanks to the snap-on fabric positioned inside the dedicated groove, replacing the slow installation of the old eyelet frames.
- Smart:** 5 fixing grooves allow coping with the stretching and shrinking of the fabric.
- Clean:** No more spots or abrasions on the fabric. Now the placement of the fabric is made side up.

## Features

Simply white, perfectly flat and clean, New Only White stands out for its elegance and harmony in any application, satisfying the requirements and tastes of the most demanding client. New Only White has the same frame of New Big Frame: The frame itself provides full vision. By simply fixing a larger fabric in the rear groove of the frame we obtain a perfectly flat, completely white screen of remarkable dimensions.

Fast and clean installation remains an absolute prerogative of this new screen even though its main quality is beauty.
