MODEL M bw

The Model M series is anything you want it to be. For style-conscious audio enthusiasts who prefer a discreet, customizable installation, the Model M delivers. The system's slim and stylish architectural speakers can be mounted on or in walls and ceilings, partially or completely concealed, for a discreet installation of powerful speakers offering as high or low a profile as you desire. Whether a large home theater or an intimate living room, your environment reflects your design style. The Model M just makes it sound better.

The Model M features freestanding boundary woofers to provide powerful and accurate bass. High-gloss black boundary woofers can be placed in the corners of the listening room; or the freestanding woofers can be substituted for the Model LS boundary woofer for more discreet in-wall placement. Either way, you'll enjoy a fully encompassing experience - direct sound and reflections from the environment arrive at the listening point at exactly the same time. This added efficiency allows you to play back your audio at higher levels without any distortion.
