

Professional Dynamic Microphone	DM30
Professional Condenser Microphone	CM30

CM30

DM30

Features

- With full anti-interference
Anti - electromagnetic interference and anti-mobile phone interference help the microphone avoid whistling or noise from the microphone.
- With switch impact eliminated
Some special technology is applied for eliminating noise when switching on/off the microphone. And it also avoids damage to the microphone.
- Support battery/ phantom power supply switched automatically (only for CM30)
Two power supply mode for CM30, convenient for application.
- With good frequency, high-fidelity
Applying a special high-quality heart-shaped and ultra-pointing to the microphone core, coupled with a reasonable electro-acoustic circuit to make frequency response more broad and flat, producing high fidelity, clear and charming voice.

Description

DM30/CM30 is shaking-proof conference microphone with switches (including built-in switches) and instructions. It can be assembled or disassembled easily. It's designed to put on desk. It has strict audio transmission and can match different phantom powers (Phantom power is only for CM30). Its base is made from Integral die-cast metal, delicate and small-sized.

Specification

Model	CM30	DM30
Capsule Type	Condenser	Dynamic
Frequency response	30Hz-20kHz	50Hz-16 KHz
Sensitivity	-45dB±2dB	- 73dB ± 3 dB
Output impedance (ohms)	75Ω	600Ω ± 30 % at 1 K Hz
Polar Pattern	Uni-Directional	Cardioid
Working voltage	phantom 48V	--
Micro tube length	455mm	
Base size (w * d * h)	115 * 138 * 40 mm	
Anti-interference	Anti-mobile phone, anti-electromagnetic	
Net weight	1.1KG	
Gross weight	1.9KG	
Packing size	450x175x75mm
