YASHI

Learning becomes fun

Yashi Interactive I-Desk, when learning becomes fun.

Young digital natives live with the idea that anything can be interactive and this bring them to improve their thought process. To help them gaining even better results, Yashi engineered the Interactive Intelligent Desk.

A learning and professional tool since childhood, also suitable for grown ups thanks to the adjustable height.

Main specs

72,5cm

52cm

ELECTRONIC ADJUSTABLE HEIGHT

The **electronic** adjustable height varies from 52cm to 72.5, making the desk suitable for both learning and business.

Complete gap absence between display panel and front glass grants better touch response, wider view angles and less light reflection.

Great for any environment. The 550 nit screen is capable of displaying clear, crisp images and videos with any light condition.

Sturdiness and stability grant a weightload on display panel up to 250 Kg. Rounded corners increase the overall safeness of the machine.

Water-proof: spilling liquids won't compromise the desk funcionality, allowing for uninterrupted digital and creative activities.

Display
43"4K 16:9 no glare
Water-proof
view angle 178°/178°
tempered glass 5mm
physical buttons
light sensor
Electronic adjustable height (52 ~ 72,5)

Touch screen
Capacitive Technology
up to 40 simultaneous touches
response time 6-8 ms
Over 60.000.000 lifetime taps

Connectivity
