# GLS200
Business Hands-Free Speakerphone

It is common that the call audio for laptops and smartphones in some cases do not have perfect sound quality. GLS200, the business portable speakerphone supports USB/Bluetooth connection, providing high sound quality, allowing you to enjoy excellent conference calling and music listening experience. It can be taken with you anywhere and lasts for hours. You will always be able to communicate clearly. Multimedia sound quality immerses music lovers. Flexible 2 units cascade double the cover pace and attendees. Packed with smart features, this sleek, compact business speakerphone is designed for today's high-quality lifestyle and work environment, making conference calls easier.

The business speakerphone GLS200 supports online upgrades, which can meet the individual needs of users, improve sound quality efficiently, and optimize and enhance your product experience anytime, anywhere.
